

Data Culture Toolkit Exploration Tip Sheet

- * Have you considered the value of a data team? Do you need help considering the purpose of your data team and identifying the perspectives that should inform your data work?
- * Have you considered building formal data analysis processes?
- * Have you thought about what it takes to build and maintain an effective data team?
- * Do you need tools to help create your data teaming plan?

- * Have you chosen a model of inquiry and thought about how it would benefit your data related efforts?
- * Would you like to review common barriers to data use to facilitate conversations within your state or local area about barriers and potential solutions?
- * Would you like to reflect on and discuss the group's strengths and weaknesses as they relate to building and maintaining a culture of data use?

- * Do you need resources to identify the questions you and/or your team want to answer and track the data over time?

- * Do you need help assessing the quality of the data you will use to answer critical questions?
- * What resources and tools are available to support data quality?

- * Do you want a comprehensive list of resources specifically helpful for state Part C and Part B 619 program staff working to build effective data teams and support conditions for a culture of data use at the state and local levels?
