

*Improving Data,  
Improving Outcomes  
Virtual Convening*

October 19 - 22

2020

sponsored by:

in collaboration with:

# Unlocking the Power of Qualitative Data with Data Visualization

Fred Edora, DaSy  
Jenna Nguyen, DaSy  
Tara Rhodes, Colorado

**SRI Education**  
A DIVISION OF SRI INTERNATIONAL

IDIO Virtual Convening  
October 19-22, 2020

# Agenda

Welcome & Objectives – 15 min

Presentation – 25 min

Colorado – 20 min

Activity – 25 min

Conclusion – 5 min

# Objectives

1

Define qualitative data and qualitative data visualization

2

Describe purpose and benefits of using qualitative data viz

3

Identify frameworks for qualitative data viz and examples

4

Explore methods for sharing qualitative data meaningfully

# Getting to Know You

Poll: What is your role?

**Describe how the COVID-19 pandemic has affected your early childhood data or activities.**

“Change in billing and coding in our DB”

“Delayed services/assessment. Lower referrals”

“Low referrals, more exits”

“MUCH more direct communication with the field”

“back up on data entry, missing information”

“low referrals and delayed data entry”

**“More Exits”**

“More family involvement in activities”

“Change in environment for Indicator 6 part b”

“Concerns about transitions c to b”

“Decrease in referrals”

“Teleworking can prove to be an issue with regards to data entry”

“More telemedicine and billing issues around it”

**Describe how the COVID-19 pandemic has affected your early childhood data or activities.**

“More meetings and less time for dedicated data work”

“We are using data more frequently now and basing system decisions on available information”

“We are unclear about the environment or setting when clinic-based providers use virtual service delivery accessed by the family in their home.”

“referral decrease”

“Uncertain of data reliability”

“Virtual fatigue”

“Has made us have more conversations about data”

“Lower referrals. No specific fields available for needed COVID circumstances.”

“Remote services”

“Changes to family survey process.”

“Decrease in referrals that are now increasing.”

“Develop new data points”

“COVID-19 issues taking time away from analysis”

**“Referrals are down over 25%”**

“Referrals to EI dropped to 60%”

“Collecting the data has been a challenge.”

“Activities have all gone virtual.”

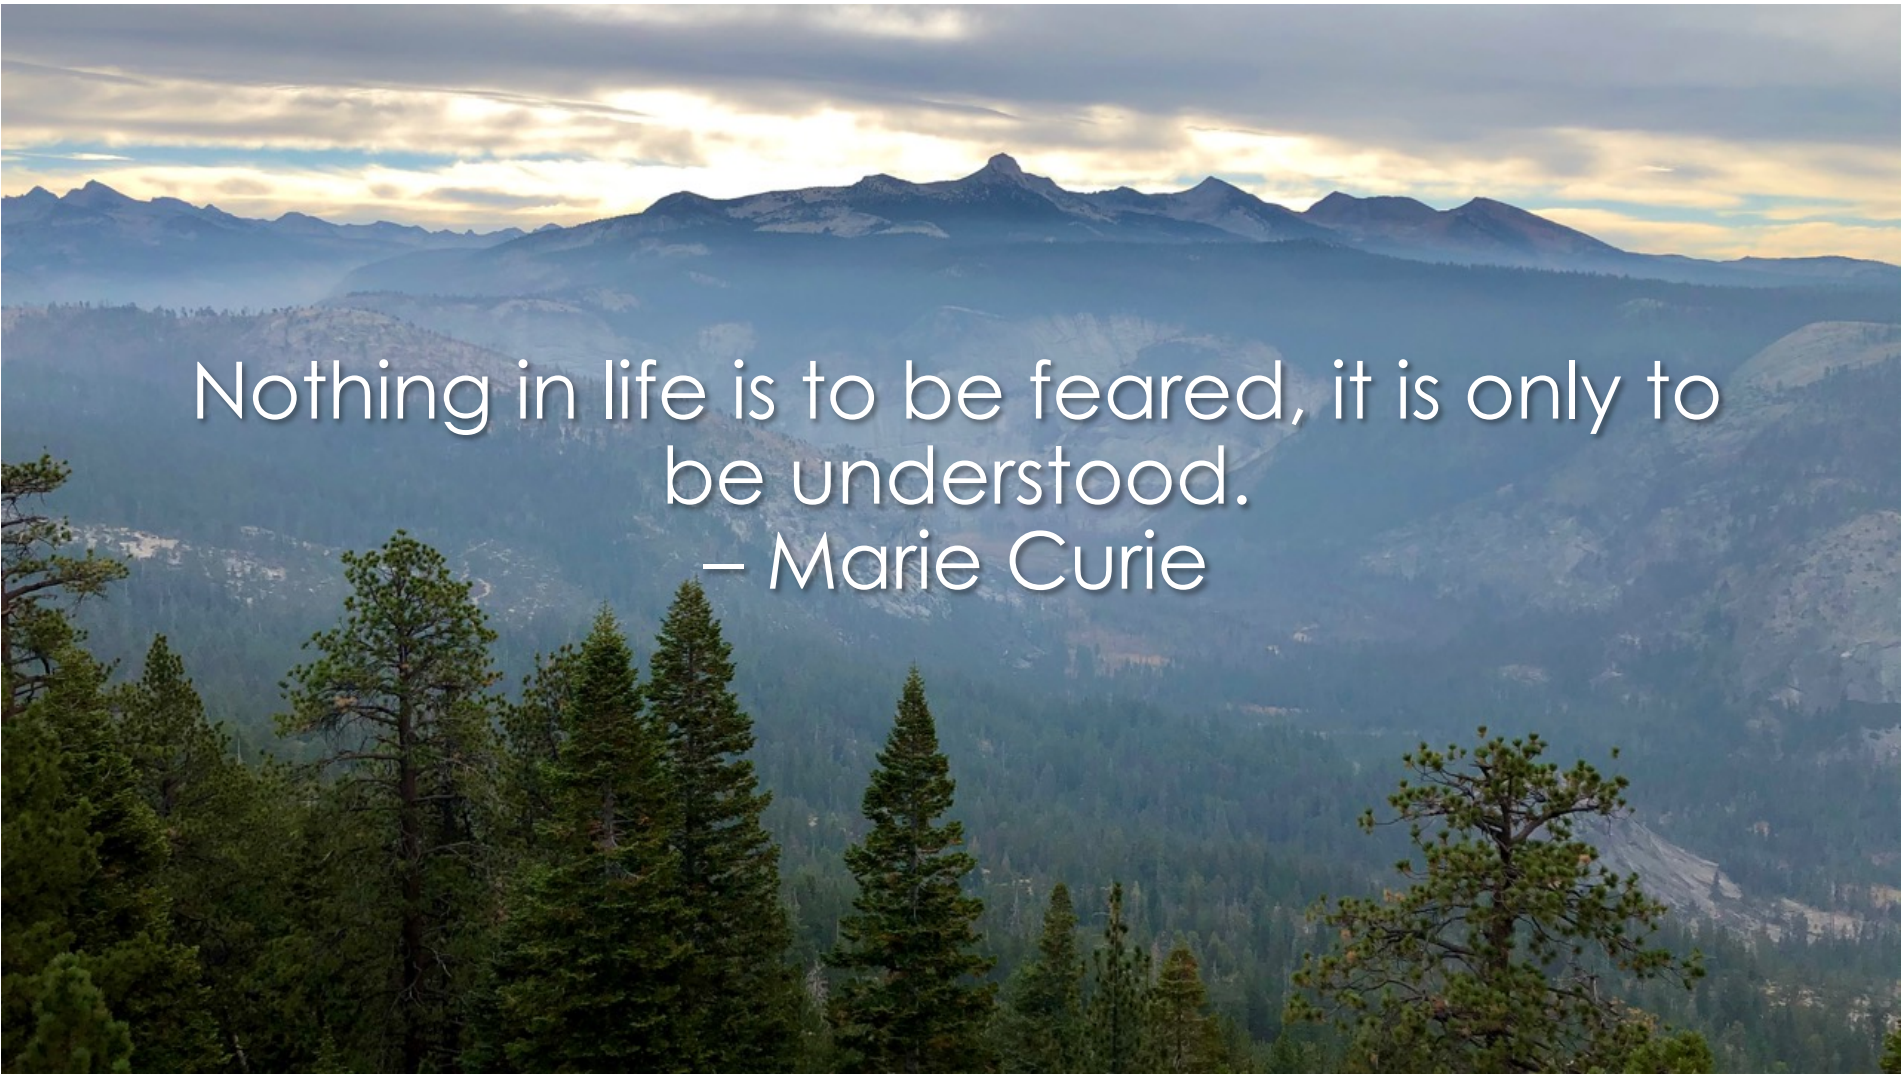

“Decrease in referrals”

“No way to capture the frustration”

“referrals have dropped by more than 25%”

“Data comparison issues”

Nothing in life is to be feared, it is only to  
be understood.  
– Marie Curie

# What Is Qualitative Data?

Image source: David McCandless "365 Days of Beautiful News"  
<https://informationisbeautiful.net/beautifulnews/>

9

Qualitative Data	Quantitative Data
Descriptive or categorical data	Numerical data
Describes characteristics or qualities which often cannot be expressed or easily understood through numbers (e.g., opinions, views, attitudes)	Describes quantities or characteristics that can be expressed numerically (e.g., numbers, counts, percentages, demographics, census data)
Examples of qualitative data collection: <ul style="list-style-type: none"> <li>• Questionnaires (i.e., open-ended survey questions)</li> <li>• Interviews</li> <li>• Focus groups</li> <li>• Observations</li> </ul>	Examples of quantitative data collection: <ul style="list-style-type: none"> <li>• Questionnaires (i.e., closed-ended survey questions)</li> <li>• Longitudinal studies</li> <li>• Randomized control trials</li> </ul>
Examples of qualitative data visualization: <ul style="list-style-type: none"> <li>• Word clouds</li> <li>• Timelines</li> <li>• Matrices</li> </ul>	Examples of quantitative data visualization: <ul style="list-style-type: none"> <li>• Bar graphs</li> <li>• Pie charts</li> <li>• Scatter plots</li> </ul>
Used to generate hypotheses	Used to test hypotheses

# What Is Data Visualization?

“Data display in a graphic format is a way of portraying information succinctly and efficiently, illustrating details provided in longer textual information.”

# What Makes a Good Visualization?

explicit (implicit)

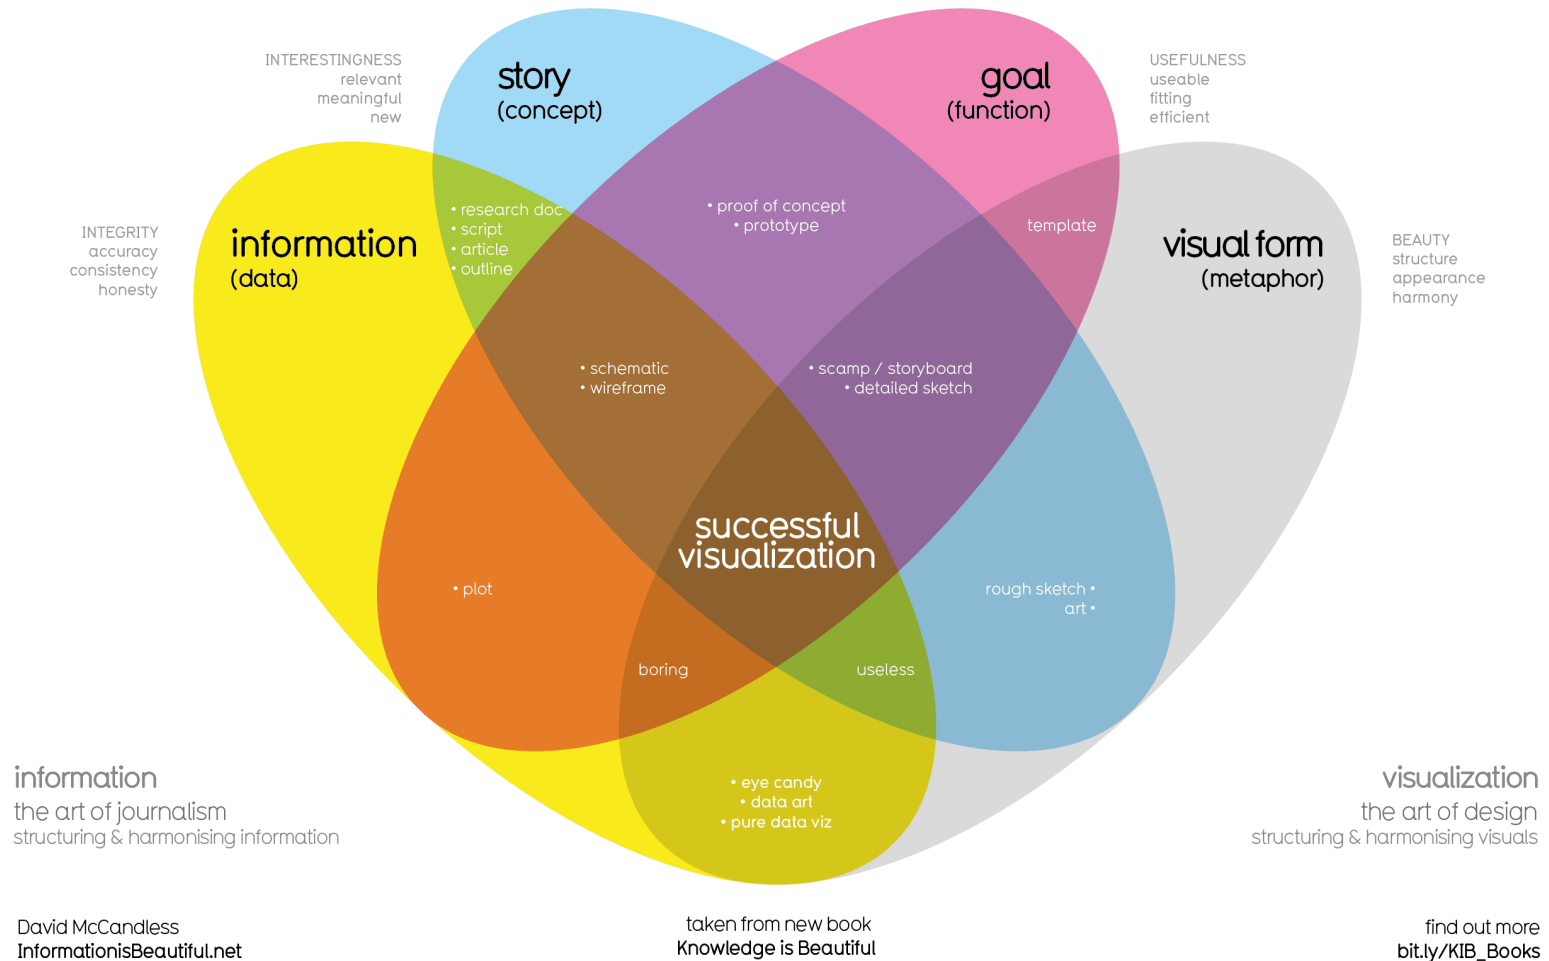

Image source: <https://unsplash.com/photos/iMdsjoiftZo>

## When Should We Use Qualitative Data Viz?

Qualitative data visualization can be useful when:

- Much of the information you will be collecting is not numerical
- You want to explore the data in a creative way to your audience or stakeholders
- You want to show connections in the data and/or generate hypotheses

# What Can You Do with Qualitative Visual Displays?

Can be used to:

- Reduce and focus text
- Highlight themes and patterns in the data
- Identify outliers
- Convey a message, discovery, or particular perspective
- Introduce new levels of understanding
- Purpose of “illuminating rather than obscuring the message”

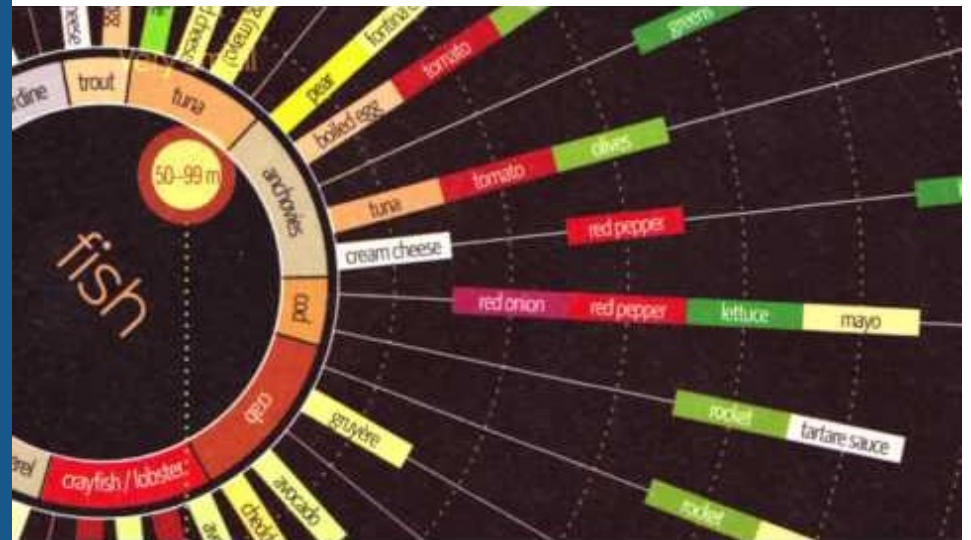

# How Does Qualitative Data Visualization Benefit Our Audiences?

Audiences can:

- Acquire new insights
- Develop elaborate understanding
- Appreciate new knowledge
- Build theories
- Draw conclusions
- Take action

# Qualitative Visualizations by Display and Complexity

*Visualizing Qualitative Data in Evaluation Research* (2013) by Stuart Henderson & Eden H. Segal

**Figure 3.1. Graph Showing Variety of Qualitative Visualizations by Display and Complexity**

# Types of Qualitative Visual Displays and Purposes

*Data Display in Qualitative Research* (2013) by  
Susanna Verdinelli &  
Norma I. Scagnoli

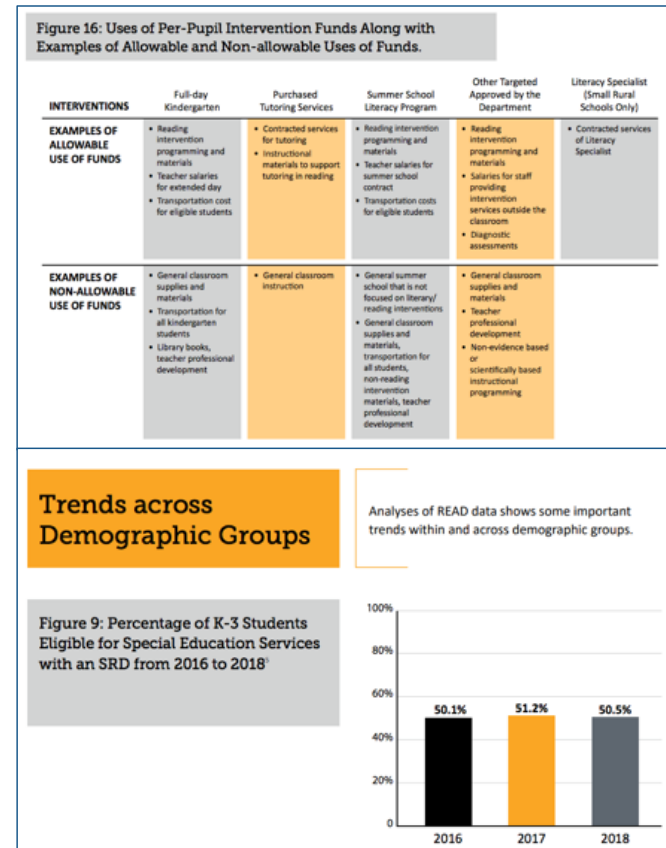

Visual Display	Purpose
Boxed Display	To highlight a specific narrative considered important and frame it in a box
Decision Tree Modeling	To describe options, decisions, and actions
Flow Chart	To illustrate directional flow and show pathways of different groups
Ladder	To represent the dimensions of the progression of certain phenomenon through time or to show levels or stages
Matrix	To cross two or more dimensions, variables, or concepts of relevance to the topic of interest
Metaphorical Visual Display	To depict in a metaphorical way the topics or themes found
Modified Venn Diagram	To indicate shared or overlapping aspects of a concept, a category, or a process
Network	To depict relationships between themes and subthemes or categories and subcategories
Taxonomy	To classify or organize information

# Boxed Display

- Text framed within a box
- Highlights a specific narrative considered important
- Simplest form of display

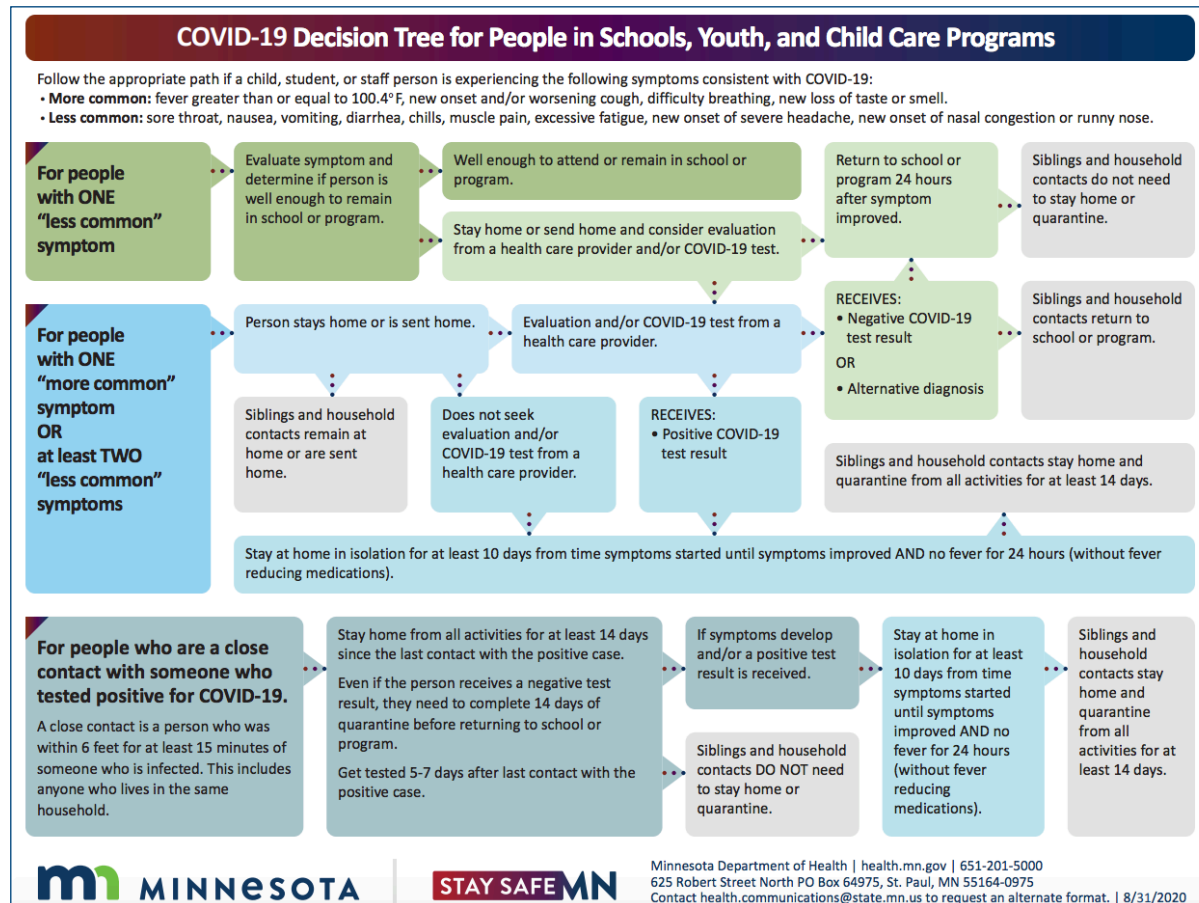

Quick-Reference Statistics (2018-19)	
• 29,360 total authorized CPP positions	
• 27,530 total children served in CPP	
• 1,829 children served with two CPP positions for full-day services (12 percent of positions/7 percent of funded children)	
• 5,586 ECARE positions used for full-day kindergarten (19 percent of all CPP positions/20 percent of all preschoolers and kindergarteners funded by CPP)	
• 175 out of 179 school districts participating in CPP	
• \$122.5 million in total program funding	
• \$4,171 average funding per CPP position (\$4,448 average funding per child)	

# Decision Tree Modeling

- Describes options, decisions, and actions

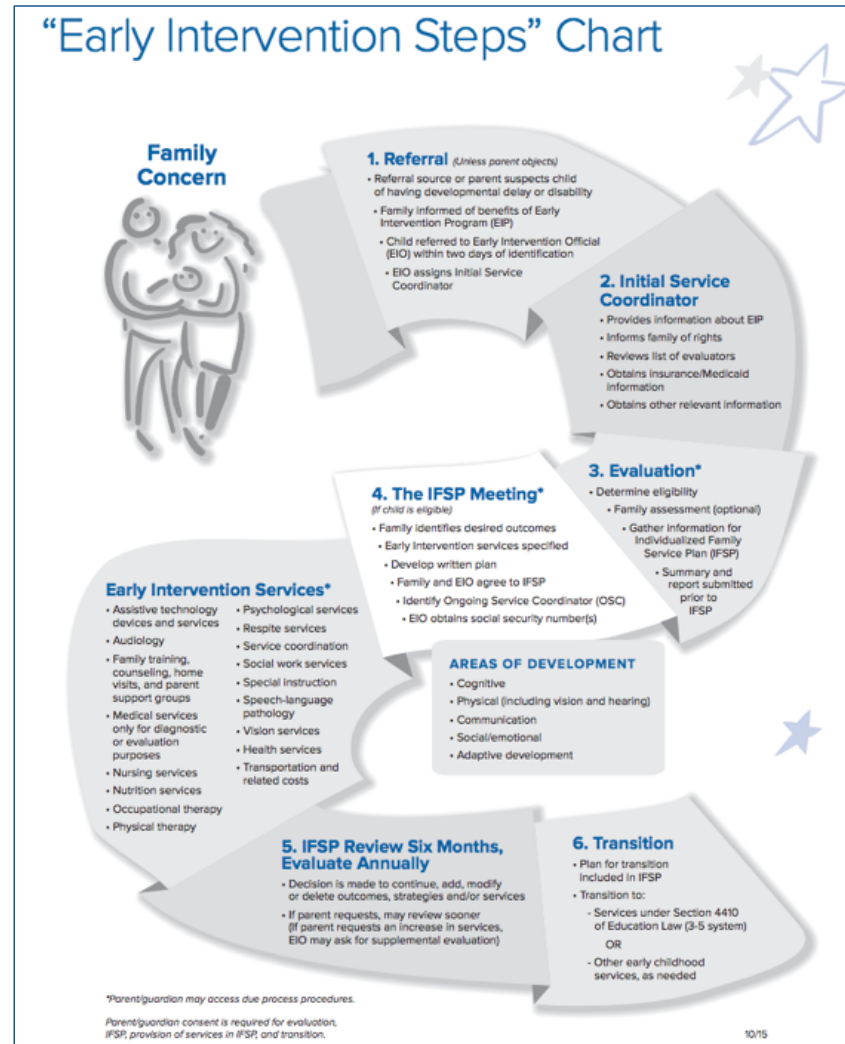

## Flow Chart

- Illustrates directional flow
- Arranged in terms of their relationships in a process or through time rather than as static entities

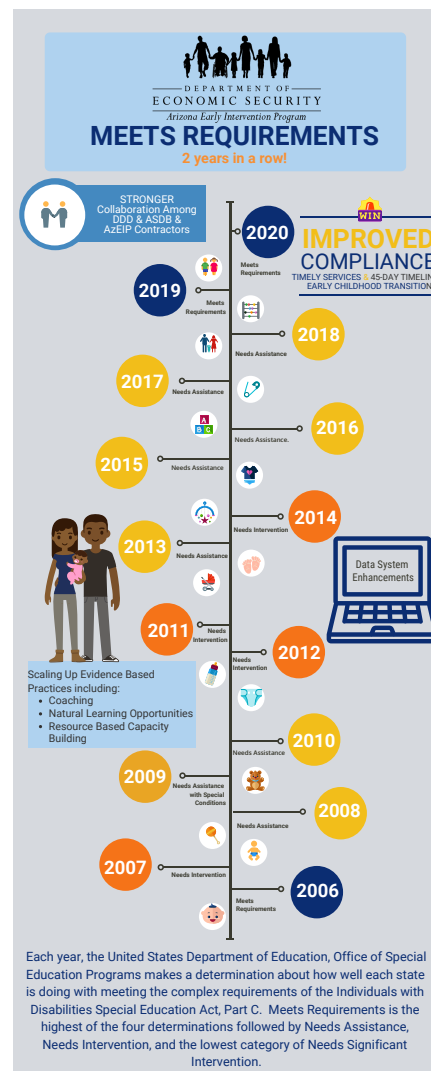

25 Sources: <https://nirn.fpg.unc.edu/module-5/introduction> and <https://www.health.ny.gov/publications/0532.pdf>

## Ladder or Step-by-Step Process

- Represents the progression of certain phenomenon through time to show levels or stages
- Additionally, indicates the level of change at each step
- Ladders are unidirectional

# Matrix

- Cross-classification of two or more dimensions, variables, or concepts of relevance to the topic of interest

**Figure 3.5. Matrix Displaying the Level of Importance of Themes Uncovered in Interviews With Training Program Participants**

Themes	Trainees Interviewed						
	lv 1	lv 2	lv 3	lv 4	lv 5	lv 6	lv 7
mentor support	important	important	somewhat important	important	important	important	somewhat important
pilot funding	important	somewhat important	important	important	important	somewhat important	important
required course	important	not important	important	not important	not important	important	important
training program participation	somewhat important	important	not important	important	important	not important	important
planned happenstance	not important	important	not important	not important	somewhat important	important	important
conference attendance	somewhat important	important	important	not important	important	not important	not important
grant writing support	important	important	important	important	somewhat important	important	somewhat important
early career development	not important	somewhat important	important	not important	important	somewhat important	important

**important**
 **somewhat important**
 **not important**

Note: lv# is the number of each trainee. Darker shades indicate increased importance of theme.

Source: Henderson & Segal (2013)

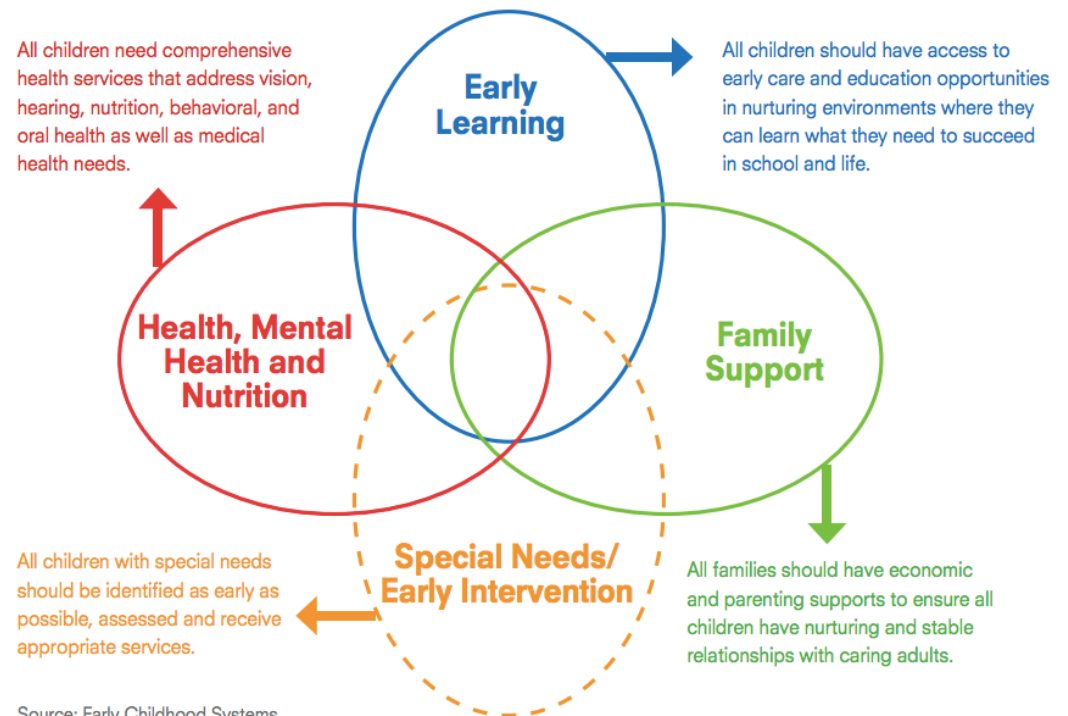

# Metaphorical Visual Display

- Depicts topics or themes in a metaphorical way

# Modified Venn Diagram

- Indicates shared or overlapping aspects of a concept, category, or process
- Often used to depict a model or conceptual framework

Source: Early Childhood Systems Working Group. 2006.

## Comparative Word Cloud

- Visual display of word counts

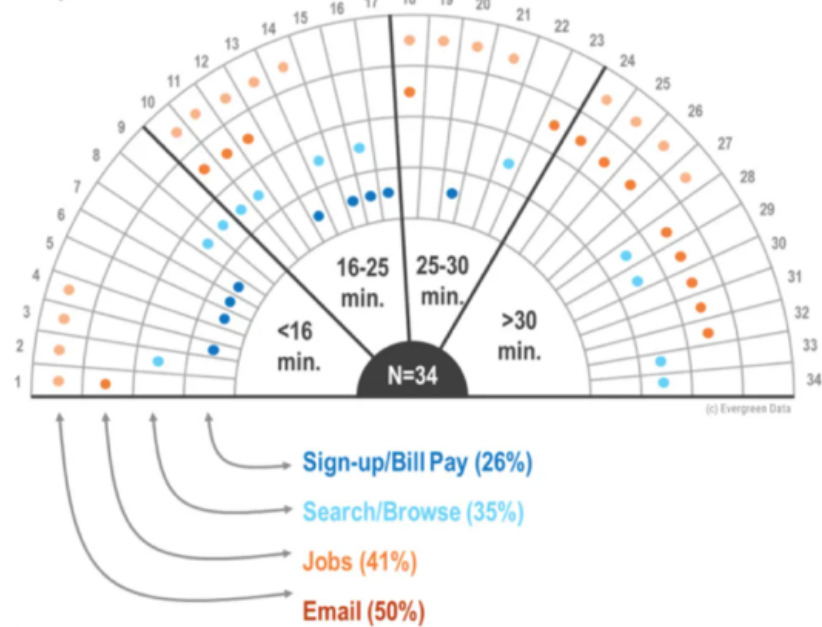

# Spectrum Display

- A data display which allows you to display individual data in a way that tells a story

Most people who used the computer for **more than 30 minutes** were doing **job related things**.

**Signing up and paying bills** took **less than 25 minutes** for all participants but one person.

# Colorado Process

- Information
  - Wanted a way to communicate preschool outcomes to those directly working in programs
- Story
  - Created a visual that included various Excel visualizations
- Goal
  - Realized some inefficiencies in communication, out-of-date visuals, tedious process
- Visual Form
  - End result: Colorado's Indicator 7 Data Quality Profiles in Tableau

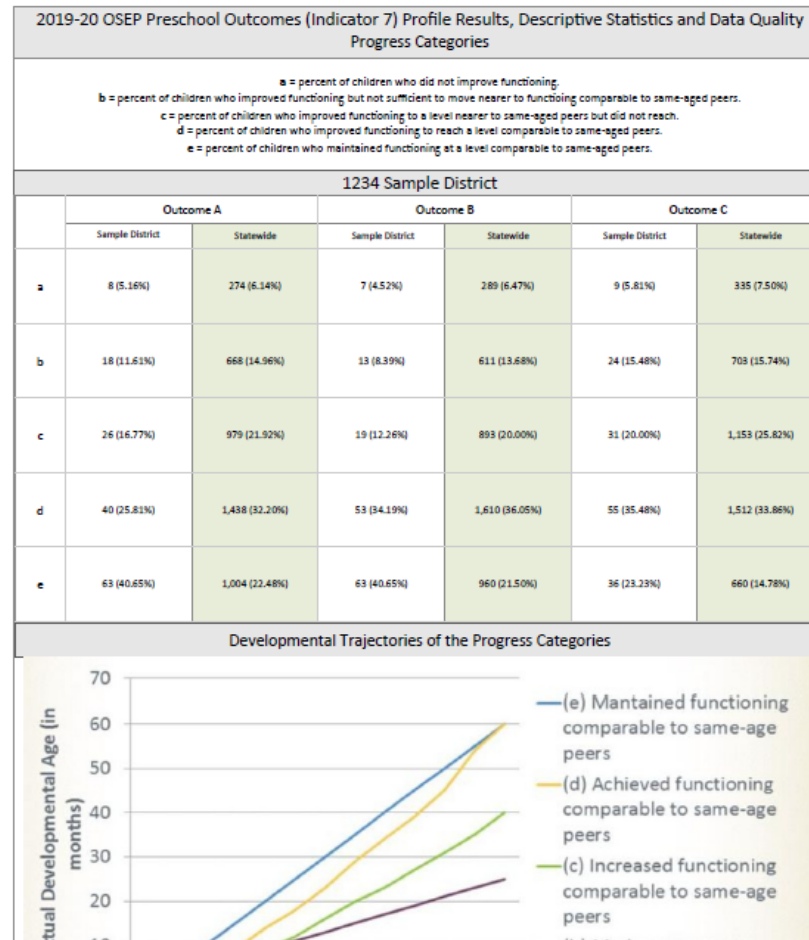

# Overview

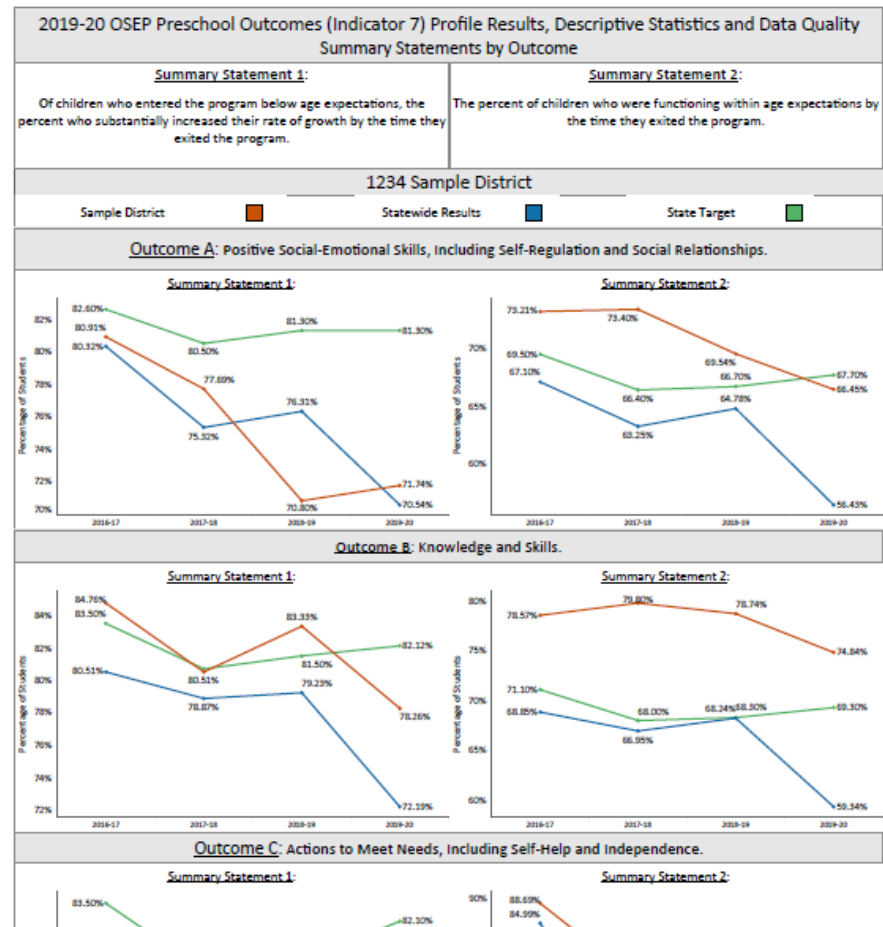

Source: Colorado Data Quality Profile – OSEP Preschool Outcomes (Indicator 7)

# Progress Categories

Source: Colorado Data Quality Profile – OSEP Preschool Outcomes (Indicator 7)

# Summary Statements

# Data Quality Information

2019-20 OSEP Preschool Outcomes (Indicator 7) Profile Results, Descriptive Statistics and Data Quality Comparisons of Entry and Exit Scores							
<p>As mentioned in the first section of this report, preschool outcomes (Indicator 7) are tied to child progress made between entry to preschool special education services and exit from preschool special education services. Another way to visualize this information is a comparison table between scores at entry and scores at exit. These tables, organized by outcome, have been provided below.</p> <p>One reason to review scores in this way is to evaluate the quality of the data collected. Typical growth is described as staying within four levels of the scale (ranging from 1 to 7) from the entry score. Progressing beyond four levels from the entry score would be considered atypical growth. While this is possible, it is highly improbable. CDE recommends evaluating the entry and exit scores for data quality concerns for the children identified as outside the typical growth ranges.</p>							
1234 Sample District							
<u>Outcome A: Positive Social-Emotional Skills, Including Self-Regulation and Social Relationships.</u>							
(Orange highlights the number of students outside of typical growth ranges)							
Entry Score	1	2	3	4	5	6	7
1	4	2		5			
2	1	3	2	1	1		1
3		2		2	3	3	
4		2	2	3	10	7	5
5				1	7	11	13
6					1	13	30
7						2	16
<u>Outcome B: Knowledge and Skills.</u>							
(Orange highlights the number of students outside of typical growth ranges)							
Entry Score	1	2	3	4	5	6	7
1	4	2					
2	1	2		2	3	1	
3		1	1	1	7	1	1
4				3	4	8	8
5				1	5	13	21
6					2	7	27
7						2	27
<u>Outcome C: Actions to Meet Needs, Including Self-Help and Independence.</u>							
(Orange highlights the number of students outside of typical growth ranges)							
Entry Score	1	2	3	4	5	6	7

# Activity

**What are your reactions?**

A word cloud of various reactions, with the words arranged in a roughly triangular shape pointing downwards. The words are in different colors and sizes, indicating their frequency or importance. The most prominent words are 'interested', 'excited', and 'inspired'. Other words include 'informed', 'impressed', 'overwhelmed', 'positive', 'empowered', 'puzzled', 'fascinated', 'intrigued', 'ready', and 'options'.

interested  
excited  
inspired  
informed  
impressed  
overwhelmed  
positive  
empowered  
puzzled  
fascinated  
intrigued  
ready  
options

## Qualitative Data Visualization

How have you used qualitative data viz in your state? +

COVID CIRCUMSTANCES hardly any - some polling in trainings and meetings like the word cloud + 6	Mostly for public reporting + 0	Reporting back COM results to LEAs + 0
legislative reporting + 0	Getting data buy-in from local programs. Sharing themes from surveys. + 0	Public Report, Stakeholder feedback for APR, feedback for developers + 0

What's worked well? What have been the benefits? +

LISTS OF CONDITIONS (AS IN WORD CLOUD) + 0	More interest in data from local programs and stakeholders. + 0	People have been more interested in the data + 2
The ease of use + 0		

What types of data viz are you interested in learning more about or trying? +

Word Tree, Rating + 2	Heat Maps, contrasting word clouds + 2	Before and After to illustrate differences between data captured in 2019 vs. 2020 + 3
Have been working on producing more infographics, using a variety of the approaches shared today + 2	Geographical maps for regional comparisons + 0	

What's unclear? What support would you like? +

BI SOFTWARE OPTIONS AND CAPABILITIES + 1	Programs that can help with producing some of the items described today + 0	Power BI, 508 Compliance, visualization best practices (colors, size, etc.) + 0
---	--	--

# Conclusions

- Qualitative data describes characteristics or qualities which often cannot be expressed or easily understood through numbers
- There are a wide variety of methods that can help display non-numerical information, all of which can be effective when used appropriately
- Understanding qualitative data visualization can provide you with more tools to increase understanding of early childhood data among your stakeholders
