

DATA PARTNERSHIPS AND THEIR BENEFITS

Individuals with Disabilities Education Act (IDEA) Agencies
Supports timely agency to agency transitions and provides data for analysis of children's services and child outcomes across programs.

Early Hearing Detection and Intervention (EHDI) Supports coordination of timely services for children with hearing impairments and provides data for analysis of program impacts.

Finance Supports access to revenue from Medicaid and private insurance. Supports analysis of cost data.

Child Abuse Prevention and Treatment Act (CAPTA) Supports analysis of data across programs, increases referral process efficiencies, and enhances agency collaboration.

Personnel Supports understanding of workforce characteristics (e.g., licensing/certification and PD).

Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Supports effective collaboration and coordination with multiple home visiting programs.

Quality Rating and Improvement System (QRIS)
Supports understanding of program quality and professional development needs of staff in programs in which children may be attending.

Early Childhood Integrated Data Systems (ECIDS)
Provides access to linked data for cross-program analysis of services and program impacts.

Other Agencies or Programs Supports understanding about child and family access to other programs (e.g., Head Start, Women Infant Children (WIC), Supplemental Nutrition Assistance Program (SNAP), Early and Periodic Screening, Diagnostic and Treatment (EPSDT), and child care resource and referral.

Statewide Longitudinal Data Systems (SLDS) Provides data to answer questions about long-term educational outcomes.
