Chicago, Illinois*

Today

- Review professional development (PD) resources targeting core skills needed for quality Child Outcomes Summary (COS) practices
- Explore the resources and ways to apply them in your work

Related to: State Child Outcomes Measurement System Framework (S-COMS)

Link: <https://ectacenter.org/eco/pages/childoutcomes-framework.asp>

Which Best Describes Your Primary Role...

- Families
- Practitioners
- Professional development staff (local, regional, or state level)
- State staff and administrators
- Higher education or consultants
- Federal representatives
- National TA providers
- Other?

Your Familiarity with the COS Process...

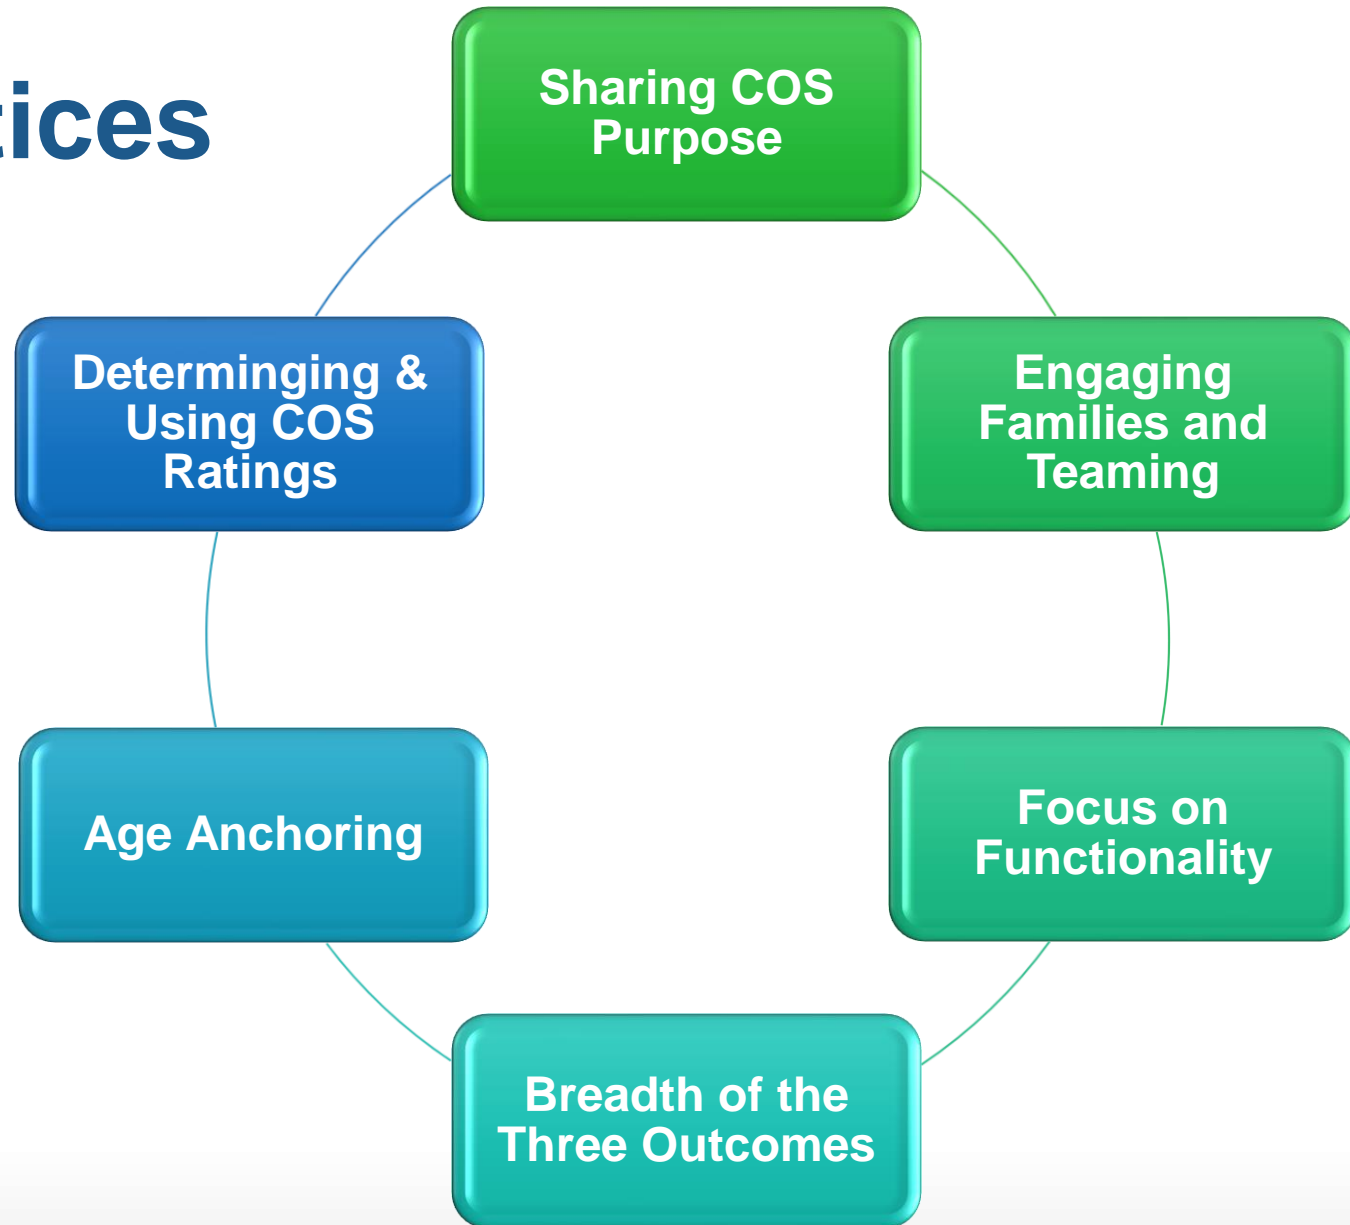

How familiar are you with the COS Process?

- 1 - Brand new to it.
- 2-
- 3-
- 4-
- 5 – Very well versed in it and train/mentor others

What Does It Take to Implement a High-Quality COS Process?

Key COS Practices

NOTE: Listen to identify which resources you want to discuss further in a breakout activity.

Handout contains links

Breadth of the Three Child Outcomes

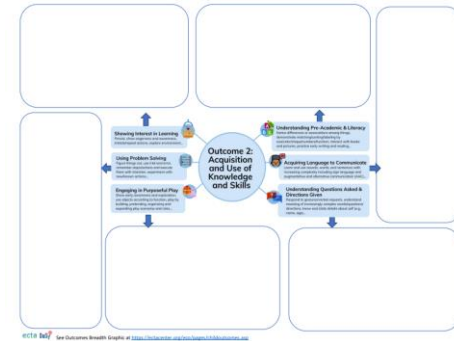

What: Graphic showing key content associated with each of the three child outcomes. Also includes examples of note taking resources.

Purpose and Use: Visual aid showing a framework for describing and consistently measuring the three child outcomes. It helps teams include a similar set of functional skills when they gather information and discuss each outcome in COS rating discussions.

Audience: Introductory level – practitioners, supervisors, family members, and PD staff

Aspect of Outcome Area	Outcome 3: Use of Appropriate Behaviors and Actions to Meet Needs	What skills have you seen from your child related to this aspect of the outcome? What does your child do? Give examples.	During what routines do you see these skills?
Moving Around & Manipulating Things to Meet Needs Move with increasing control and purpose (e.g., reach, roll, crawl, walk, run, climb) to navigate the environment - with accommodations as needed, manipulate objects/tools (e.g., crayons, scissors, switches, fragile items) with increasing control...			
Eating & Drinking with Increasing Independence Suck/swallow, chew, bite, finger feed, use utensils, hold bottle, drink from cup, show growing independence with amount/type of food eaten, access food and feed self...			
Dressing & Undressing with Increasing Independence Assist with dressing, take off/put on shoes and clothes, undo/do fasteners...			
Diapering/Toileting & Washing with Increasing Independence Lift legs for diaper change, sit on potty, wash hands, brush teeth, help with bathing...			
Communicating Needs Indicate hunger/need for sleep/diaper change, express discomfort/hurt, request or reject food, express choice/preferences...			
Showing Safety Awareness Avoid dangers (e.g., putting things in mouth, touching hot stove), follow safety rules across settings and situations... Note: This awareness is less evident in very young children			
Other comments about use of appropriate behaviors and actions to meet needs. Examples: sharing how skills vary across settings and situations and things you are working for your child to do next.			
What else do we need to know (include all outcomes, feel free to use the back of the page)?

Aligning a Child's Functional Skills with the Breadth of the Three Child Outcomes

What: Resource to help teams align their observations of children's functional skills with the three child outcomes. Second resource helps explain "functional."

Purpose and Use: Provides background information to help teams become more comfortable aligning observed skills to specific outcomes. Resources in the set help teams understand which skills are functional and use a four-step thinking process to help align skills until it becomes a more natural and a nearly-automatic process. Working on these skills helps with a more consistent and accurate COS process.

Audience: Intermediate level – practitioners, PD staff

Aligning Functional Skills with the Three Child Outcomes

Step 1. Provide Detail

Is there sufficient detail that describes what the child is doing? If not, the team will have to gather more information. If the information is too broad or nebulous, teams will struggle to understand the child's skills.

Step 2. Convey Function

Does the detail convey the functional nature of the child's skills? Teams must not only gather detailed information about a child's skills, but they must also gather detailed information about how the child uses those skills across the settings and situations in their day-to-day actions and interactions.

Step 3. Unpack into Functional Skills

Does the observation of the child's functioning include multiple skills? Do the skills require unpacking to align with an outcome? Observations and conversations with caregivers often provide information about multiple skills. When this occurs, teams must unpack the information by separating them into functional skills that can be effectively aligned with one of the three child outcomes.

Step 4. Align with an Outcome

To which skill bundle and outcome does each functional skill align? With detailed descriptions of a child's functional skills, sufficiently unpacked, teams can align those skills with the appropriate outcome and corresponding skill bundle.

KEY RESOURCE: Each of the three child outcomes encompasses an array of functional skills. The *Breadth of the Three Child Outcomes* highlights six bundles of functional skills associated with each outcome. The bundles help teams consider the breadth of a child's functioning within each outcome and align skills with an outcome to determine accurate Child Outcomes Summary (COS) Process ratings.

Teaming, Engaging Families, and Indicators of a Quality COS Process: The COS-TC

II. Explaining the COS Process to Families

Quality Practices	No	Partly	Yes
<i>'No' indicates that the practice is not observed; 'partly' indicates that the practice is observed some of the time or that some, but not all, of the practice is observed; 'yes' indicates the practice is fully observed most or all of the time.</i>			
1. Providers explain to the family why outcomes data are collected and how they are used.			
2. Providers describe the three child outcomes that are measured.			
3. Providers describe how the outcome data are collected.			
4. Providers check for family understanding before moving on.			
Notes			

II.1. Explaining the COS Process to Families — Alyssa

This video shows a provider and both of the child's parents meeting in the family home. The provider explains why the COS information is collected and how it is used, gives brief definitions of the three child outcomes, and checks for parent understanding. The second provider was not able to attend this meeting but did provide input which this provider shares later in the meeting (not included in this clip).

Download Video Download Closed Captions

II.3 Providers describe how the outcome data are collected.

What it is

For each of the three outcomes, team members determine how the child is currently doing by discussing information that has been obtained about the child's functioning in many different ways. Providers can reinforce the approaches that were used to gather information about the child's functioning (e.g., assessment, observation, interviews, etc.) and when the information was collected. Then, in collaboration with families, all team members consider the mix of functional skills a child has for each of the outcome areas and then determine how close these skills are to age-expected development. The process is repeated later (i.e., annually and/or at exit) to have information that helps identify changes observed in the child's functioning.

Norton

We measure child outcomes by compiling all that we know about Norton's functioning in each of the three outcome areas. Then, as a team, we determine Norton's functioning relative to age expectations and choose statements for each outcome that describe his mix of skills.

By carefully considering Norton's functioning as he gets started in early intervention, participates in early intervention, and as he leaves early intervention, we can understand how he has progressed. We measure outcomes for every child in our program so that we can understand the results for Norton and all children in the program.

More about it

The Federal Office of Special Education Programs (OSEP) requires early intervention programs and local school systems to report outcomes data for every child ages birth through five who receives early intervention or special education services. Early childhood outcome data are collected when a child begins to receive services and again when the child exits from services. In some programs, the data are collected annually, as well.

Emanuel

Based on all the information you've shared and all that we've gathered, today we'll work together to determine where Emanuel is in each of the outcome areas and relative to what is expected of children at 18 months of age. We'll refer to the PLOD that we shared with you earlier, as we go along. We look forward to any additional information or questions you have.

Teaming, Engaging Families, and Indicators of a Quality COS Process: The COS-TC

- **What:** Checklist and resource explaining what each quality practice is, why it is critical, and gives two examples of what effective implementation looks like.
- **Purpose and Use:** Tool for coaches to observe and provide feedback about indicators of a quality COS process and team collaboration or for self-assessment. Online practice tool with videos available. There also is a trainer’s guide and video library for incorporating into PD.
- **Audience:** Intermediate level – practitioners, supervisors, coaches, and PD staff after completing the COS module.

COS-TC checklist sections:

- planning for the COS,
- explaining the COS process to families,
- understanding child functioning,
- building consensus for a high-quality COS rating, and
- interactive practices.

Age Anchoring Guidance for Determining COS Ratings

Age Anchoring Guidance for Determining Child Outcomes Summary (COS) Ratings

Guidance for EI/ECSE Practitioners and Trainers

April 2018

Please cite as: Early Childhood Technical Assistance Center and Childhood Data Systems. (2018). Age anchoring guidance for determining child outcomes summary (COS) ratings: Guidance for EI/ECSE practitioners and trainers. http://ectacenter.org/~pdfs/eco/COS_Age_Anchoring_Guidance.pdf

Use.....	3
Age Anchoring Basics	4
1 - What is age anchoring?.....	4
2 - Why is age anchoring important?.....	5
3 - What do the categories age-expected (AE), immediate foundational (IF), and foundational (F) mean?.....	6
4 - How much of the child's skills and behaviors need to be age anchored?.....	7
5 - Who age anchors the child's skills and behaviors?.....	8
6 - When should age anchoring occur?.....	9
The Process of Age Anchoring Skills and Behaviors	10
7 - When is a skill or behavior categorized as immediate foundational rather than foundational?.....	10
8 - How are developmental progressions used in age anchoring?.....	11
9 - What is the thinking process for age anchoring?.....	12
Age Anchoring Tools	13
10 - What tools can a team use to age anchor functioning?.....	13
11 - What if tools give different age expectations for similar skills?.....	14
12 - What if an age anchoring tool does not address the skills the team is trying to anchor?.....	15
Special Circumstances	16
13 - How are a family's cultural expectations taken into consideration when age anchoring?.....	16
14 - How are splinter (or scattered) skills and atypical functioning addressed when age anchoring?.....	17
15 - How are significant negative (or interfering) behaviors addressed when age anchoring?.....	18
16 - What about skills that come in earlier and do not change much as children get older?.....	19
17 - What if the team cannot agree?.....	20
Checklist on Age Anchoring for the COS Process	21

What: Resource on age anchoring questions including why age anchoring is needed, basic information about it, process of age anchoring, tools, and special considerations.

Purpose and Use: Guidance about age anchoring and information about consistent, efficient ways to gather information and age anchor skills in the COS process.

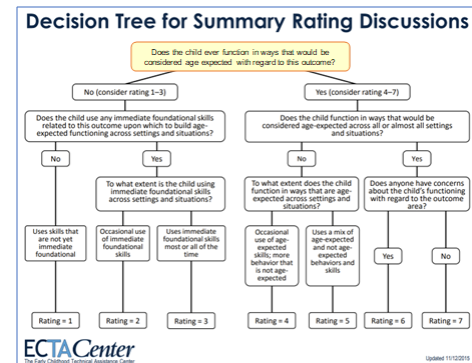

Audience: Practitioners, supervisors, coaches, and PD staff after completing COS module.

https://ectacenter.org/~pdfs/eco/COS_Age_Anchoring_Guidance.pdf

Child's Name & Age:	Outcome 1: Positive Social-Emotional Skills (including social relationships)	What are some specific examples	What is expected for this age?	AE-IF-F
How is the child?				
1. Relating with Caregivers Demonstrate regulation and attachment, respond/initiate/ sustain interactions, acknowledge coming and goings...				
2. Attending to Other People in a Variety of Settings Express awareness/attention, respond to/offer greetings, respond to own/others' names...				
3. Interacting with Peers Convey awareness, respond/initiate/ sustain interactions, share/care/resolve conflicts, play near and with peers...				
4. Participating in Social Games & Communicating with Others Respond to/initiate/sustain games and back-and-forth communication, demonstrate joint attention, engage in mutual activity, follow rules of games...				
5. Following Social Norms & Adapting to Change in Routines Transition between activities, respond to new/familiar settings/interactions, behave in ways that allow participation, follow routines and rules...				
6. Expressing Own Emotions & Responding to Emotions of Others Show pride/excitement/frustration, manage own emotions, display affection and comfort others...

This content is in draft form, last updated August 19, 2022. It appears online in the Child Outcomes Summary (COS) Learning Community webspace. For access, please contact Kellen.Reid@unc.edu

DRAFT
Spearheaded by
the COS Learning
Community

What: Resource with practice scenarios and considerations for team decision making about whether a child’s functioning counts as “ever” AE when answering the first question on the COS Decision Tree. Scenarios include examples where function, consistency, quality, state of health, and culture influence ratings.

Purpose and Use: Facilitate discussion about scenarios as part of a training activity or for self-directed learning. Supports consistent and accurate COS ratings.

Audience: Intermediate - Practitioners, supervisors, coaches, and PD staff after completing COS module.

Contact Kellen.Reid@unc.edu to join COS Learning Community.. Login to the COS Learning Community at <https://ectacenter.org/communities/login.asp?from=http%3A%2F%2Fectacenter%2Eorg%2Fcommunities%2Fcos%2Fcoslc%2Easp>

Child Outcome Summary – Practice Scenarios (COS-PS)

<https://ectacenter.org/eco/pages/cosps.asp>

Euriah (Age 45 months) Domain-based Assessment – Social-Emotional

Assessment Notes	Functional and Descriptive?	Outcome 1, 2, or 3	AE, IF, or F
1. Euriah needs time to separate from his parents in familiar settings and needs more time to adjust to new settings with unfamiliar adults.	<input type="checkbox"/> No	<input checked="" type="checkbox"/> O1	<input type="checkbox"/> AE
	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> O2	<input checked="" type="checkbox"/> IF
		<input type="checkbox"/> O3	<input type="checkbox"/> F

Children of this age typically: *manage most separations without distress provided a trusted adult is present. Can self-soothe with little adult support.*

Outcome 1 - Positive Social-Emotional Skills Including Social Relationships

Does the child ever function in ways that would be considered age-expected with regard to this outcome?

Yes
 No

Document examples of age-expected or not age-expected functioning that helped you answer this question:

type your text here

What: Users review child descriptions/videos from referral, intake, and assessment and identify if the skills are functional; relate to outcomes 1, 2, or 3; age anchor the information; and determine COS outcome ratings. Feedback is provided about correct responses.

Purpose and Use: Practice and strengthen skills in the COS through individual self-study or as part of small or large group training, coaching, or mentoring activities.

Audience: Anyone involved in the COS process or for PD staff, coaches, and supervisors providing PD on the COS. Use after completing the COS module.

Children are 31 months and 45 months, plus more scenarios planned in the future.

Aligning a Child's Functional Skills with the Breadth of the Three Child Outcomes

Naomi Younggren, Lauren Barton, Robin Rooney, and Faith Scheibe

Updated August 16, 2022

This content appears online at <https://ectacenter.org/ectcpages/cos-align.aspx>

Aligning Functional Skills with the Three Child Outcomes

Step 1. Provide Detail

Is there sufficient detail that describes what the child is doing? If not, the team will have to gather more information. If the information is too broad or nebulous, teams will struggle to understand the child's skills.

Step 2. Convey Function

Does the detail convey the functional nature of the child's skills? Teams must not only gather detailed information about a child's skills, but they must also gather detailed information about how the child uses those skills across the settings and situations in their day-to-day actions and interactions.

Step 3. Unpack into Functional Skills

Does the observation of the child's functioning include multiple skills? Do the skills require unpacking to align with an outcome? Observations and conversations with caregivers often provide information about multiple skills. When this occurs, teams must unpack the information by separating them into functional skills that can be effectively aligned with one of the three child outcomes.

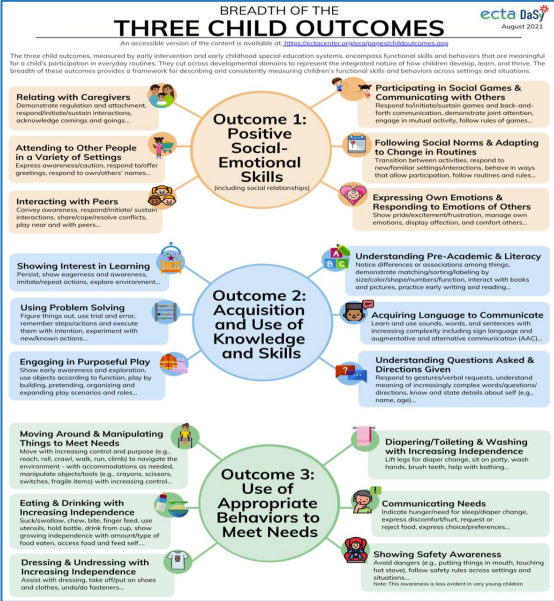

Step 4. Align with an Outcome

To which skill bundle and outcome does each functional skill align? With detailed descriptions of a child's functional skills, sufficiently unpacked, teams can align those skills with the appropriate outcome and corresponding skill bundle.

KEY RESOURCE: Each of the three child outcomes encompasses an array of functional skills. The *Breadth of the Three Child Outcomes* highlights six bundles of functional skills associated with each outcome. The bundles help teams consider the breadth of a child's functioning within each outcome and align skills with an outcome to determine accurate Child Outcomes Summary (COS) Process ratings.

COS Process Online Module: Collecting and Using Data to Improve Programs

The ECTA Center and [DaSy Center](#) developed an online learning module that provides key information about the COS process, and the practices that contribute to consistent and meaningful COS decision-making. Over the course of multiple sessions, participants learn about:

- why child outcomes data are collected;
- the key features of the COS process;
- the essential knowledge needed to complete the COS process;
- how the three child outcomes are measured through the process;
- how to identify accurate COS ratings using a team-based process;
- the importance of comparing children's current functional performance to age-expected functioning;
- when and how to measure progress in the three child outcome areas; and
- how to document ratings and evidence to support those ratings in COS documentation.

After registering for the module, you will be automatically redirected to it. The module is self-paced, so you can access it as many times as you need to.

[Get Started](#)

See also: [COS Professional Development Resources](#), [Self-Directed Learning](#)

COS Process Professional Development

Provided here is a collection of national resources to support COS training and technical assistance. The resources are displayed in a sequence and designed to be embedded in various types of professional learning opportunities, such as webinars and face-to-face trainings.

[COS Process Professional Development: Guidance for Preparing and Implementing Effective Training and TA](#) contains all the information you will need to understand the sequence and suggestions for identifying an appropriate starting point in your professional development context.

Build Knowledge of the COS Process

Practitioners gain an understanding of essential COS concepts.

- The [COS Process Online Module](#) provides key information about the COS process and the practices that contribute to consistent, meaningful COS decision making.

Practitioners gain understanding of unique features of the COS in their state.

- [State/Program-Specific COS Process Policies and Procedures Checklist](#) contains child outcomes measurement policies that should be communicated to practitioners.

Develop COS Process Skills

Practitioners gain skills for effective implementation of the COS process.

- [Applied Practice for COS Skill Building Activity](#) includes activity instructions and written case studies for practitioners' applied practice.
- [Age Anchoring Guidance for Determining Child Outcomes Summary \(COS\) Ratings](#) provides answers to commonly asked questions about age anchoring as it applies to the COS process and examples of how the guidance applies in practice.
- [Topical COS PD Activities](#) includes a collection of targeted PD activities and materials indexed by topic.
- [COS Practice Scenarios \(COS-PS\)](#) are a collection of scenarios of children, ages 6 months to 5 years, that allow you to practice aligning information about each child with the three child outcomes and anchoring the information by age.
- [COS Team Collaboration \(COS-TC\)](#) includes training materials and activities that support the self-assessment of COS activities.

Encourage Continuous Improvement on the COS Process

Provide opportunities for ongoing support to continue to improve practitioners' COS process skills.

- [Special Considerations When Using the Child Outcomes Summary \(COS\) 7-Point Scale: Questions and Answers](#)
- [Build Knowledge of the COS Process](#)
- [Develop COS Process Skills](#)

Frequently Used Resources

- [Child Outcomes Summary \(COS\) Process Quick Reference Guide](#)
- [Resources for More Information about the Child Outcomes Summary \(COS\) Process](#)
- [Overview of the COS Process](#)
- [Decision Tree for Summary Rating Determination](#)

Topical COS Professional Development Activities

These activities focus on aspects of the COS Process providers frequently need additional training and support. The [Child Outcomes Summary \(COS\) Process Online Module](#) prepares Part C and Part B, Section 619 staff to use the COS process to describe how children are doing on the three child outcomes.

For assistance, contact Kellen Reid:

kellen.reid@unc.edu

Considerations

It is important to note that these materials are not stand-alone training activities. It is imperative that PD staff ensure those who participate in these training activities first complete the COS Process Online Module. ECTA staff are available to provide technical assistance to help PD staff consider how to use the materials presented on this page and determine strategies for individualizing training for specific audiences and formats. Prior to selecting any activity, PD staff should ensure that the content is consistent with their state's COS policies and procedures and adapt, if necessary (e.g., add information about the state's COS policies and procedures).

Organization of the Materials

The materials on this page are organized into COS process topical sections. Each section includes activities (with instructions, handouts, and supplemental resources) that can be used to enhance EI and ECSE practitioners' understanding of a particular aspect of the COS process addressed in the online module. The activities in each section are classified for either an EI or ECSE audience, or both, but any activity may be adapted to present to both audiences together.

The following topics are included in the collection of training activities:

General COS Activities: Provides background information for those new to child outcomes measurement and/or the COS process.

Assessing Functional Skills: Focuses on how to gather and consider information about a child's functional skills in everyday settings and across daily activities/routines.

Age Anchoring: Addresses the process by which the COS team compares the child's functioning to age-expected development.

Using the 7-Point Scale: Reinforces an understanding of the criteria for each point on the COS 7-point rating scale.

- [General COS Activities](#) +
- [Assessing Functional Skills](#) +
- [Age Anchoring](#) +
- [Using the 7-Point COS Scale](#) +
